

Summer Jewelry Styles Worth The Splurge

July 11, 6:55 AM • Style Examiner • Naima Turner

Jewelry is the one way to make any look unique and in an instant. Looking for jewelry to boost your summer look? There are so many styles to choose from and among the choices available. Several jewelry trends will be just as strong in the fall as they are now, which makes it worth the splurge while shopping. Some of the hot jewelry trends worth investing in NOW are:

- 1) Mixed Metal chain bracelets and necklaces
- 2) Eclectic mixed pieces (such as metals mixed with pearls, etc.)
- 3) Jewels with flower, snake or elephant motifs
- 4) Fringed necklaces
- 5) Jewels in rich royal tones such as purple and green

Overall, when shopping for jewelry, always keep in mind your own personal style. Statement jewelry pieces are the best way for you to make your very own, personal statement. The same way that jewelry catches your eye before you actually make the purchase - is the same effect when paired with an outfit. It can make or break a look. Statement pieces are always key, but tread carefully when coordinating and make a simple statement, like with one or two pieces! This is one way to keep your personal style message visually coordinated.
